Dear Supplier Partner,

Electronic Data Interchange (EDI) has proven to be one of the outstanding drivers in retail information technology systems resulting in *time and cost savings* for both retailers and suppliers. With these technologies and guidelines, Pep Boys can expedite merchandise flow to the selling floor, manage inventory better and process payments efficiently. Pep Boys continues to move forward with our initiative for all supplier partners to become 100% EDI compliant.

Please review the EDI requirements attached and return the sign off form within 14 days of receiving this request. If necessary forward this request to the appropriate management level individual for approval

If you are unable to meet the EDI requirements return the sign off form and state "not compliant". We will work with you to contact an EDI provider to help you implement EDI requirements.

Providing a timely response to this request will avoid non – compliant charge back penalties.

Please return your responses to paul_heidler@pepboys.com .

For a full review of our EDI, requirements and standards please reference our website at <http://info.pepboys.com/> .

Best regards,

Diane Pizzarelli
